

SHURE®

MARKETING PROPOSAL

PRESENTATION BY: AKSHATHDAYAN SURESH

OBJECTIVES

- Increased Market Share
- Better Brand Image & Awareness
- Larger Customer Base
- Meeting Customer Needs
- Increasing Revenue
- Staying Competitive

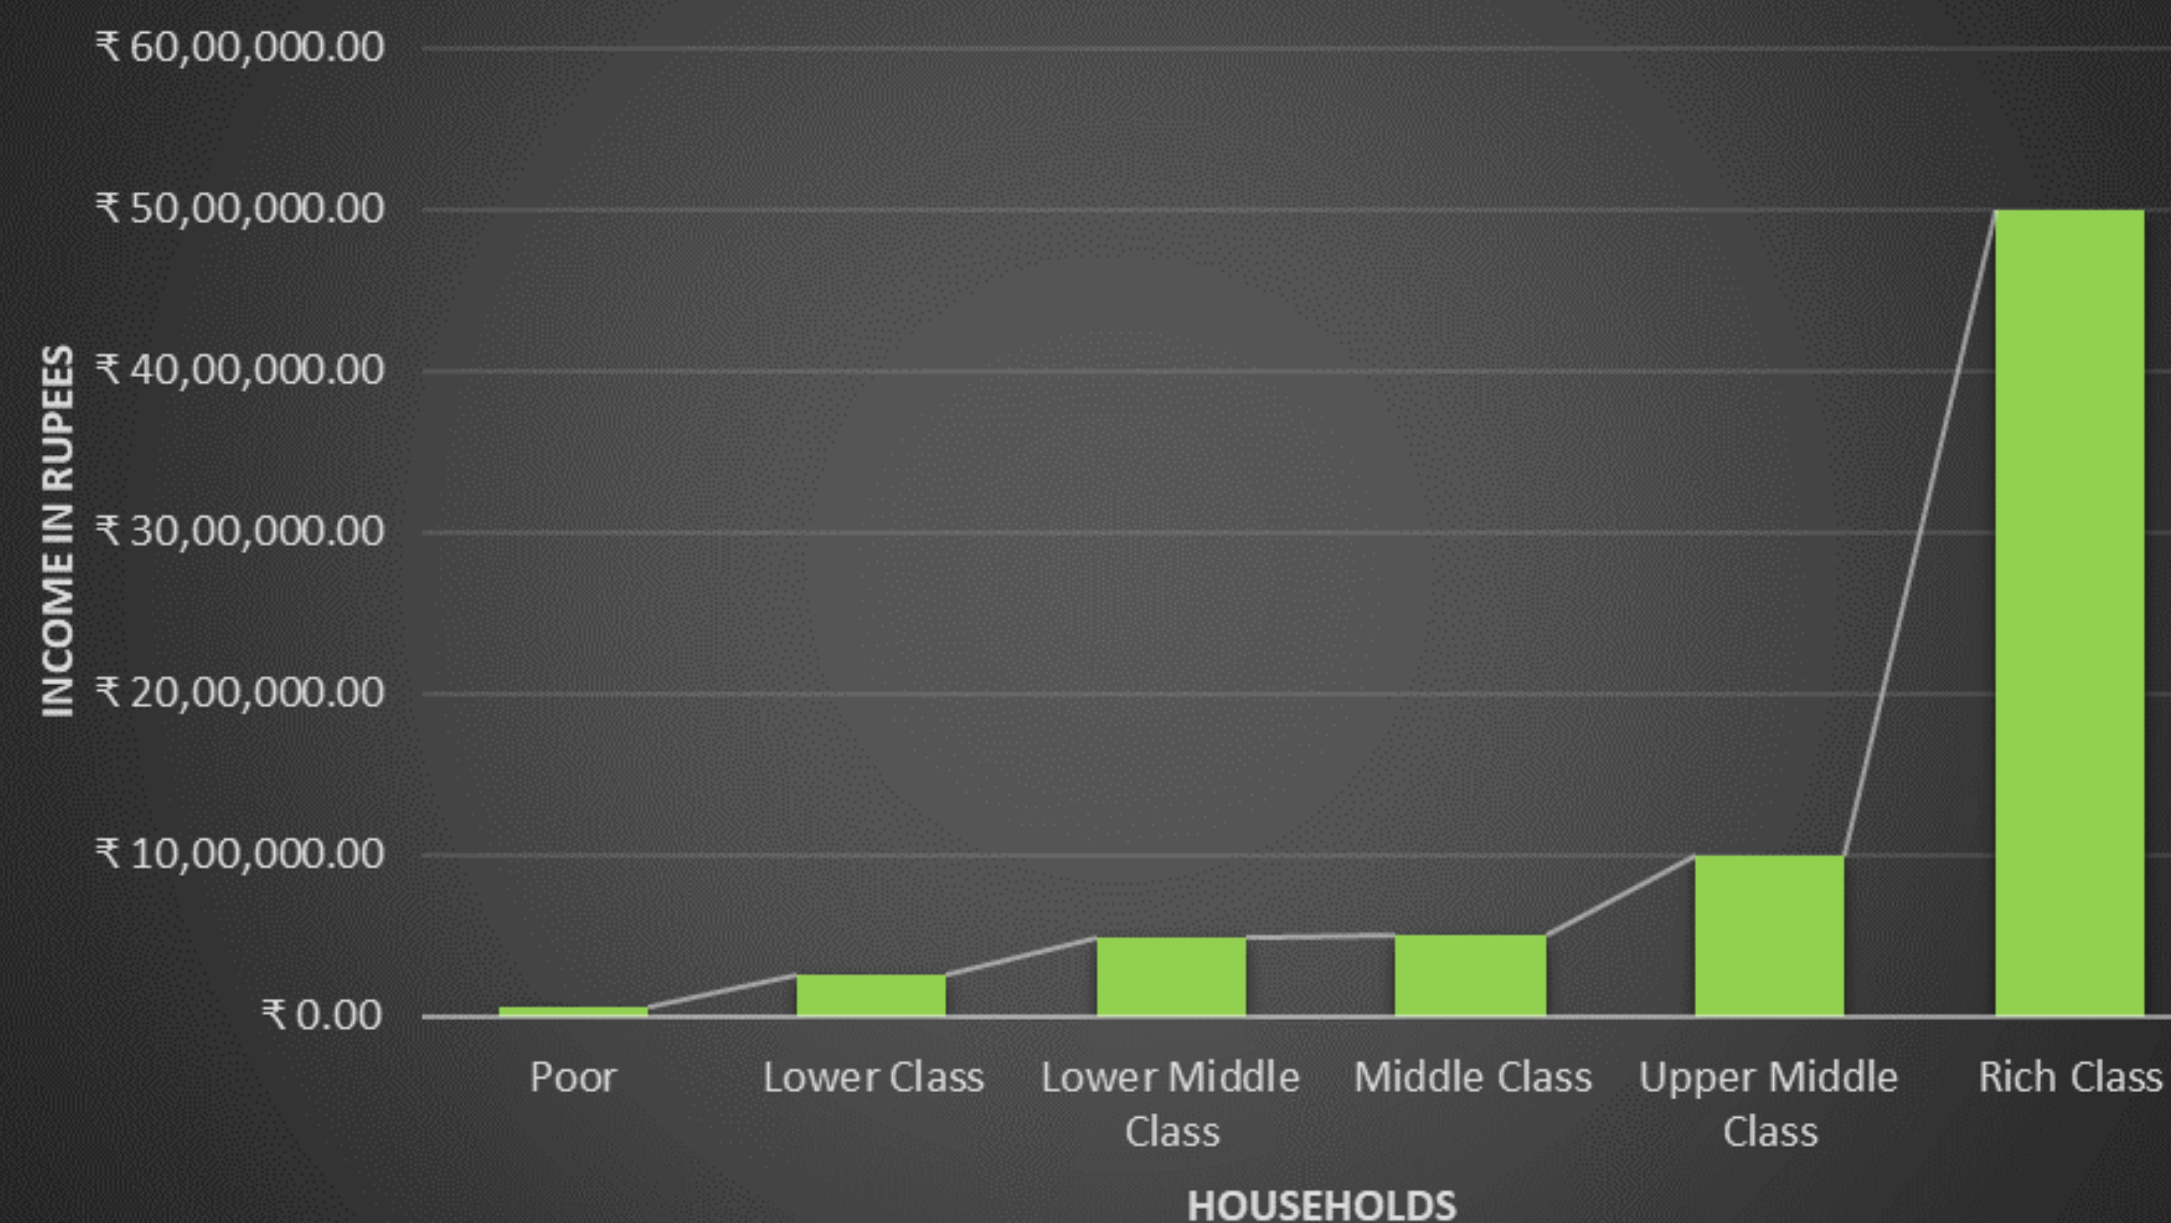

MARKETING MIX

- Price – Set an affordable and competitive price.
- Product – Meet customer demands and requirements, fill market gaps. Ensure good quality and durability (Quality Control and Assurance). Which product to sell?
- Promotion – Advertisements, celebrity endorsements, discounts. To create a want or demand among the customers. Use of the internet to influence.
- Packaging – Sleek and Attractive design. Frustration-free packaging and protection of product. Provide information of innovative technology i.e “Roswellite” ribbon material.
- Positioning – Market position/share and brand image.
- Place – Right and cheap distribution channels. Mass or Niche Market? – Target Market
- People – Efficiency of employees to be effective during sales and other steps of the process.

THE INDIAN MARKET

- The price of Shure's products range from ₹ 700 – ₹ 9,40,000, with amazon.in and 3rd party companies distributing most of Shure's products in India.
- Most popular/ demanded products are microphones that range from ₹ 1000 – ₹ 7000.
- Shure's own official distributor (Suninfonet Pvt Ltd.) is located in New Delhi but is unestablished/ doesn't cater to South India i.e. cities like Bangalore.
- The price makes products only affordable to the middle, upper middle and rich classes of the Indian economy as these groups earn 2-5 lakhs, 5 to 10 lakhs and up to to 50 lakhs a year, respectively. So can use their disposable income after income tax of 30% to purchase Shure's products, with sufficient purchasing power.
- India also has a rapid growing audio technology market (25% + per annum) with usage in music production, consumption and in the corporate offices. The total market is worth 1000 crores.

INDIAN INCOME LEVELS PER HOUSEHOLD

MARKET RESEARCH

Primary

- Online Surveys – Usage of social media to gather information.
- Interviews – Interviewing customers to identify specific requirements i.e. health concerns regarding loss of hearing.
- Observation – Watching or recording what people do/buy. Identifying present trends.
- Consumer Panels/ Focus Groups/ Sampling – Address target market needs based on selected customers,

Secondary

- Own Sales Information – Records of previous years' sales, how has Shure been successful in the US or in previous years of sales?
- Government Statistics – Spending patterns, Income and Demands.
- Newspaper/Internet Articles – General information on markets or trading conditions/trends in the market.
- Market Research Agencies – Carry out specific market research information.

SALES OPPORTUNITIES

- India has more than 50% of its population below the age of 25 and more than 65% below the age of 35.
- The majority of consumers are in the working class population who keep up with trends and the latest technology. The average salary of these people being ₹ 30,000 – ₹ 60,000 per month.
- Hence, most demanded products in the audio industry can be Headphones, Earphones (Bluetooth/Wired), Speakers, Home theatre systems and Microphones.
- India added 1,200 tech startups in 2018. These companies may require a high volume of audio tech equipment for effective communication within the business.
- India has also become a hub for Fortune 500 companies and AV manufacturers.
- Metropolitan cities such as Bangalore, Hyderabad, Mumbai, etc. Host concerts/festivals with popular DJs and Artists E.g. Sunburn. These events also require a large volume of amplifiers and speakers.
- Products can also be promoted and sold to students/ upcoming recording artists from music schools such as Trinity.

PRODUCT PERSPECTIVE

Shure's recent successful products include the following :

- GLX-D Advanced Digital Wireless Systems for Music Venues, Schools and House of Worship (Churches).
- P300 IntelliMix Audio Conferencing Processor for Audio and Video Conferencing.
- Limited Edition SM58 Microphone.
- Axient Digital Wireless Microphone System
- Super 55-BLK Deluxe Vocal Microphone Pitch Black Edition
- Refresh of the iconic Model 55 Unidyne microphone.
- Bluetooth SE Model Earphones.

Due to the success and innovate abilities of these products, they can also be sold and distributed in India.

ACHIEVEMENTS

Shure, considered & recognized as the world's leading manufacturer of microphones and audio electronics has always had a successful journey. This puts the brand on top, which sets makes Shure highly competitive.

Recent Awards include :

- 2018 Global Excellence Award
- 2018 TEC Awards – KSM8 Dualdyne Dynamic Microphone (winner)
- Readers' Choice 2016 : Headphones-Overall. Shure – 9.1
- 2014 IEEE Milestone Award Winner. Unidyne Microphone. World's first unidirectional, single element, dynamic microphone.

COMPETITION

- Even though Shure is a globally recognized brand, it faces heavy competition in India, especially being fairly new in the market.

These brands include :

- Audio-Technica
- Pioneer
- Harman JBL
- Harman Kardon
- Sony
- Sennheiser
- Bose
- Logitech
- Harman AKG
- Beats Electronics
- Marshall
- Yamaha

A WAY FORWARD

Opening a Sales and Marketing Office in Bangalore, India as said by Country Director Chicco Hiranandani, will benefit Shure immensely as they have a closer presence to customers and partners.

Furthering Shure's presence in Asia, the new location will support the Company's commitment to managing its sales channel in South Asia, including India, Bangladesh, the Maldives, Nepal, and Pakistan. It will also enable Shure to be closer to its customers and increases its accessibility and response time to market challenges and opportunities. While the new office will solidify Shure's presence in the region, customers will still be directed to purchase products through established distributors and partners. "The new office presents an opportunity to reinforce our commitment to this lucrative market and better understand the customer, which is imperative for long-term success." said Mark Humrichouser, Vice President of Global Sales at Shure.

Conclusively, the market development strategy will help Shure increase the target market, sales and revenue, market share, spread risk, gain a better brand image and be highly competitive.

THANK YOU!
